

Last Step Rinse

For Brewers & Homebrewers

sisbrew.com

DESCRIPTION

Effective acid anionic rinse designed to remove beerstone, scale and other soils. Effective at all temperatures. Can be used in CIP applications, keg washing and soaking parts. Great for removing odors and flavors from lines. Do not use on aluminum.

DIRECTIONS

Dilute product at 1-2 ounces per 5 gallons of water depending on soil load. Can be used with any water temp, but do not exceed 150°F. Circulate or soak solution to insure 2-5 minutes of contact with equipment. Do not use on aluminum.

APPLICATIONS

- Keg washing and CIP of tanks
- Brewery, beverage and food manufacturing systems
- Parts soaking to remove tough soils
